

Launch of ValuNet Deluxe 5.4 that Support Windows Vista

We are pleased to announce the launch of ValuNet Deluxe 5.4 that supports Windows Vista, the latest operating system platform from Microsoft. This software version can also work on Windows 2000 SP4, Windows 2003 Server SP2 as well as Windows XP SP2 or above.

Apart from the support of Windows Vista, ValuNet Deluxe 5.4 comes with several useful new features which include:

- Option to sort in ascending or descending order of all sorting fields.
- A character counter feature in the memo fields of TDEC entry form.
- A profile database for Materials for Certificate of Origin.
- Buttons for “New MD from” and “New AP from” in Certificate of Origin AP/MD input form.
- Batch signing of Certificate of Origin MD/AP at the same time if exporter and manufacturer profiles are installed on the same PC.
- Printout of collection slip for Certificate of Origin by company.

Customers who need a ValuNet solution that supports Windows Vista and / or want to take advantage of the new enhanced features of ValuNet Deluxe 5.4, please complete and return the following reply slip to us. We will deliver the software free of charge to your address stated below. Should you have any enquiry, please call our Customer Service Hotline at **2917 8888**.

Reply Slip
